Economic Policy Review

March 1978 No.4

ACKNOWLEDGEMENTS

The Cambridge Economic Policy Group, whose members' names appear below, has had an almost unchanged membership throughout its existence and all the articles presented here, though individually signed, owe a great deal to the collaboration of the Group as a whole.

The research and the econometric model of the UK on which this *Review* is based have been financed over the past six years by the SSRC, to whom we are very grateful.

We want in particular to acknowledge the contribution of Richard Bacon and Alistair McFarquhar of the Cambridge University Department of Land Economy to the article on the EEC, and estimates for the North Sea provided by John Morgan, Colin Robinson and Chris Rowland of the University of Sussex. We are grateful to Charles Kennedy of the University of Kent for his article on inflation accounting.

The entire *Review* was typed through all its drafts by Mrs Joyce Leverett; Jo Bradley subedited and firmly kept us to our deadlines.

The *Review* was produced by Cambridge Aids to Learning in 4 weeks from start to finish.
